### **Part III DETAILED ACTION**

Response to restriction requirement filed 10/29/02 is acknowledged. Applicant elected, without traverse, Group I, claims 1-17. Claim 18 is canceled. Claim 19 is added. Claims 1-17,19 are pending.

#### ***Further restriction***

Upon consideration of the added claim19, the following additional restriction of Group I was deemed necessary.

Claim 19 is improperly dependent on claim 1 as it addresses steps not required for the method of claim 1 and fails to further limit the subject matter of the base claim. The method of claim 19 is considered to be patentably distinct from the method of claims 1-17 as it requires steps of computationally analyzing protein's secondary structure and stability not required for method of Group I. Accordingly, election of one of the following Groups is required:

- I. Claims 1-17, drawn to first method for modulating peptide immunigenecity, classified in class 702, subclass 19.

Art Unit: 1631

- III. Claim 19, drawn to method for modulating peptide immunogenicity and determining stability and folding of the peptide, classified in class 702, subclass 19.

Because these inventions are distinct for the reasons given above and the search required for Group III is not required for Group I, restriction for examination purposes as indicated is proper.
